Wael KACEM

Data Scientist | Machine Learning & Computer Vision Engineer

+216 55 661 744 | waelwaelkacem@gmail.com | Wael Kacem | kacem-wael | Portfolio

Computer Science engineering student at ENSI specializing in Data Science & Computer Vision, passionate about turning complex data into concrete decisions. Experienced in building Machine Learning models on real production data and shipping full-stack products used in production. Seeking a final-year internship (PFE) of 4 to 6 months starting in February 2027 in Data Science, Machine Learning or Computer Vision to deliver measurable impact on real-world projects.

PROFESSIONAL EXPERIENCES

Data Scientist / ML Engineer Intern 07/2026 – 08/2026 (2 months)
Warp Analytics, Nabeul, TN

- Designed a Machine Learning model for the daily allocation of a client company's production teams, using its real database, to maximize daily output and optimize compatibility between employees.
- Processed and modelled real production data with Scikit-learn, Pandas and NumPy.

Full Stack Developer (Work-Study) 10/2025 – 05/2026 (8 months)
Warp Analytics, Nabeul, TN

- Member of a team of 3 developers; built Clinika *(clinika.cc)*, a SaaS management platform for dental practices, now in production with **over 10,000 registered patients**.
- Designed Moove, a sports management app with coach–client communication and automatic exercise suggestions.

Full Stack Developer Intern 07/2025 – 08/2025 (2 months)
DevWise, Nabeul, TN

- Built ExamBuilder, a SaaS platform in production (exambuilder.tn) automating exam creation and management for teachers.

EDUCATION

Engineering Degree in Computer Science — Data Science & Computer Vision 2024 – 2027
National School of Computer Science (ENSI)

- **AI & Vision coursework:** Machine Learning & Deep Learning, Artificial Intelligence, Computer Vision & 3D Reconstruction, Pattern Recognition, Image & Multidimensional Signal Processing, Mathematical Morphology, Data Science.
- **Math & Algorithms coursework:** Probability & Statistics, Numerical Methods, Stochastic Processes, Linear & Nonlinear Optimization, Graph Algorithms.

Preparatory Cycle 2022 – 2024
Preparatory Institute for Engineering Studies of Nabeul

- Admitted through the national entrance competition to engineering schools: rank 267/1800.

Scientific Baccalaureate, With Honors (Mention Bien) 2022
Lycée Dar Chaabane El Fehri, Nabeul

PROJECTS

EcoNexus Academic project – 2026

- ML-driven financial platform analysing thousands of assets in real time (fundamentals, technicals, macro, ESG (Environmental, Social, and Governance), sentiment), with portfolio allocation, strategy simulations and a generative-AI assistant.

Stock and Invoicing Management System Freelance project – 2026

- Custom desktop application (C#, .NET, WPF) built for a real client and actively used in production to this day, 1,000+ real invoices issued, making coordination between stock, finances and staff significantly simpler and smoother.

ExpertHub Personal project – 2025

- Platform connecting experts and users for online consultations.
- Presented to investors and marketing professionals at the GetE event.

SKILLS

Machine Learning & Deep Learning: Supervised & unsupervised learning, neural networks (LSTM, Transformers), statistical modelling, data preprocessing, model evaluation, knowledge graphs, vector search; Scikit-learn, PyTorch, Pandas, NumPy

Computer Vision: Image processing, pattern recognition, 3D reconstruction, multidimensional signal processing

Programming: Python, SQL, C, C++, Java

Data & Deployment: PostgreSQL, MongoDB, Neo4j, DynamoDB; FastAPI, Docker, AWS, Git / GitHub, Linux

LANGUAGES

Arabic: Native | French: Bilingual | English: Professional

EXTRACURRICULAR ACTIVITIES

ENSI Robotics Association | Positive Citizen Club | ENSI Competitive Programming Club | Junior Chamber International (JCI) | Tunisian Red Crescent
